Email Validation

Verify real emails
and improve deliverability

Quickly remove invalid emails to boost opens and achieve higher conversions with **Email Validation**.

Check Mailbox

Real-time verification determines whether messages to a mailbox will hard bounce, soft bounce or deliver.

Correct Errors

Catch and correct invalid syntax, spelling errors and typos. Great for fixing data entry errors.

Remove Bad Emails

Block toxic emails, complainers, bots and spamtraps from getting on your list and damaging your reputation.

Identify Actives

Use opener data to prioritize addresses that are actively in use.
